

Welcome to Miss Haggerty's 2nd Grade Class

Welcome to the second grade. It is an honor and privilege to have each of my students that God has placed here for such a time as this. In second grade, we are taking many great learning approaches to reach our student's needs. All of our subjects in second grade have very integrated approaches to learning.

In Bible we are learning about how God uses Moses and the Plagues to free the Israelites from bondage.

In Math we are learning about the beginning of multiplication facts. They are also learning about what a factor and product are. They are many great hands on things in the classroom to help them .

Then in Science we are learning about living things and how God created all living things. We will be taking a look at the difference between living things and non-living things.

Finally in Social Studies we are about the thirteen colonies and how the pilgrims came to America to have freedom. We will also be looking at slavery and how many fought for the freedom to the slaves.

God Bless You All!!!
