

Mrs. Wheble's Fourth Grade

God bless you!!

Welcome to our Fourth Grade class web page. This is a general overview of topics from different subjects we will be working on.

English: The students are currently working on the different types of Pronouns. We will use a variety of techniques to help students understand the concepts.

Math: The students have been working very hard with reducing fractions. The next step is adding, subtracting, multiplying and dividing fractions.

Science: We will be working on electricity & magnetism. What is an open and closed circuit? What causes a light to turn on? We will answer these questions and several others throughout the next few weeks. The students are also working very hard on their Science Fair projects about the different types of weather.

Social Studies: We will continue to look at the Garden State. We will learn the state bird, flower, motto, and many other facts about our wonderful state.

Keep up the great work! Finish the school year out strong.
