

Hayes Summer Skills and Learning Program 2009

Dear Parent,

Today, more and more parents report the following...

“Extended summer vacations cause my children to forget too much of what they have learned.”

Most of us would agree – daily exercises that are so routine in the school year simply get lost. Without regular instruction, most children have been unable to return to school in the fall and pick up where they left off.

But now, there’s a way without expensive tutors or summer school, for your child to be prepared when fall arrives. There’s even a way for your child to get ahead in the summer months. It’s called the Summer Skills & Learning Program.

Hayes School Publishing has created the Summer Skills & Learning Program for you as concerned parents. It works on the simple principle that continued involvement keeps skill levels intact and opens the door to progress. It’s been proven in homes and schools across our country as well as in foreign nations.

The Summer Skills & Learning Program is Successful and here’s why...

1. First of all, it’s easy. A brief, but informative, Parent Guide tells you where to start and lays down a simple plan.
2. The program is similar to current school lessons. Children can usually look it over and actually begin working on their own.
3. The program is more than one single program. It’s a set of custom designed activity books made specifically for each grade and skill level. You can choose the package that’s best for your children.
4. There are interesting and fun projects in each of many subjects, including Spelling, Math, Reading, Science and English to name a few. The programs are loaded with things to do.
5. And finally, since the programs have been designed by Hayes School Publishing, you’re guaranteed to get the product that educators and administrators approve.

For over 50 years, Hayes School Publishing has been supplying teachers and classrooms with educational material. We have hundreds of classroom workbooks, designed and tested by educators, that are used daily in the most demanding school system. You may find that your children have already worked with some of our learning, reference, or training guides. We maintain the highest standards and use the most advanced and up-to-date materials.

But, enough about us and teachers, it’s your children that matter – they’ll find that the Summer Skills & Learning Program isn’t meant to be cruel and unusual punishment. In fact, it really is fun for them while it gives you peace of mind.

Ordering the right package for your children is a snap. Stop by the school office to see samples. Order the grade that your child will be entering in September 2009.

Don’t let your child go back to school disadvantaged... give him/her the head start that is increasingly important.
